SUMMARY

Software Engineer experienced in building scalable full-stack web and mobile applications with TypeScript, Next.js, Laravel, and Flutter. Combines expertise in architecting complex systems with strong communication and leadership skills gained from a background in technical instruction.

EDUCATION

- Politeknik IDN Bogor** Bogor, Indonesia
Bachelor of Applied Science in Software Engineering; Current GPA: 3.72 Aug 2023 – Expected May 2027

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, PHP, Dart
- Mobile/Cross-Platform:** Flutter
- Cloud Platforms:** Google Cloud
- Other:** UI/UX Design
- Web Development:** React.js, Next.js, Laravel
- Database Management:** SQL, Firebase, Supabase
- Agile Methodologies:** Scrum, Kanban
- Languages:** Indonesian (Native), English (Proficient)

PROFESSIONAL EXPERIENCE

- IDN Boarding School** Bogor, Indonesia
Software Development Teacher, Guide & Treasurer Jul 2024 – Jul 2026
 - Delivered a comprehensive 2-year full-stack curriculum, teaching foundational to advanced web development (TailwindCSS, Laravel, React, Next.js) in the first year, and cross-platform mobile development (Flutter) in the second year.
 - Serving as a guide for the “Backpacker 20 Countries” program, coordinating international travel and educational activities.
 - Acting as the program treasurer, managing finances, budgeting, and resource allocation for the 1-year journey.

VOLUNTEER EXPERIENCE

- Google Developer Student Clubs (GDSC) Widyatama** Bandung, Indonesia
Study Jam 7.0 Mobile Development Speaker Mar 2024
 - Delivered a mobile development workshop on Flutter, BLoC, and API integration.
- Student Executive Board (BEM), Politeknik IDN Bogor** Online
Flutter IT Camp Trainer Mar 2024
 - Conducted a 2-day online workshop teaching beginners to build responsive, cross-platform Flutter applications.
- Student Executive Board (BEM), Politeknik IDN Bogor** Bogor, Indonesia
Front-end Bootcamp Trainer Dec 2023
 - Led a 5-day intensive bootcamp teaching HTML, CSS, JavaScript, and ReactJS through hands-on team projects.
- SMKN 1 Cibinong** Bogor, Indonesia
Full-Stack Web Development Mentor Nov 2023
 - Mentored 25+ high school students in a 1-week course focusing on web development fundamentals and responsive UI design.

PROJECTS

- DigiKelas** Next.js, TypeScript, Tailwind, Supabase
Interactive digital learning platform with e-modules and gamification.
 - Developed a client-server architecture using Next.js App Router and Server Actions with Supabase integration.
 - Engineered a gamified learning path with pre/post-tests, interactive modules, 6 mini-games, and live leaderboards.
 - Built a secure, child-friendly PIN authentication system with time management and anti-cheat mechanisms.
- InOut** Flutter, Supabase, PostgreSQL
Android app for managing device inventory and check-out tracking.
 - Implemented fast QR-based check-in/out workflows with robust borrowing history and activity monitoring.
 - Optimized data retrieval and isolation using indexed PostgreSQL queries and Row-Level Security (RLS) policies.
 - Integrated a Supabase backend for scalable data storage and secure user authentication.
- GasNugas** Next.js, TypeScript, Supabase, Cloudflare R2
Role-based academic management system with assignment workflows.

- Engineered a hybrid SSR/CSR application with distinct Admin, Student, and Guardian portals utilizing role-based access control.
- Developed assignment submission and approval workflows featuring detailed activity logging and penalty tracking.
- Built a real-time analytics dashboard and integrated Cloudflare R2 for highly efficient edge file delivery.

- **Hadirin**

Flutter, Firebase, ML Kit, Cloudinary

Mobile attendance app utilizing on-device face recognition and geo-fencing.

- Implemented on-device face recognition using MobileFaceNet, storing secure embeddings in Firestore.
- Engineered geo-fenced check-ins with admin-configurable radii to ensure verifiable, location-aware attendance records.
- Developed a comprehensive history interface combining face snapshots, GPS metadata, and Cloudinary media hosting.

- **mewTime**

Next.js, TypeScript, Supabase

Self-service attendance platform for managing online class sessions.

- Built a session-based system allowing lecturers to generate live, shareable class codes for real-time attendance.
- Implemented a lecturer dashboard for session management and a student portal for secure self check-ins via Supabase Auth.

- **Class of 2027**

Flutter, Firebase

Android attendance app for streamlined classroom roll calls.

- Developed a daily roll call tracking system with weekly recap generation and actionable session reports.
- Integrated Firebase Auth, Firestore, and Storage to securely manage teacher access, student rosters, and profile photos.
