SUMMARY

Software Engineer with a strong foundation in building scalable full-stack web and cross-platform mobile applications using TypeScript, Next.js, Flutter, and Laravel. Proven ability to architect complex systems, including e-commerce platforms and Learning Management Systems. Leverages a unique background in technical instruction to bring strong communication, leadership, and mentorship skills to collaborative engineering teams.

EDUCATION

- Politeknik IDN Bogor** Bogor, Indonesia
Bachelor of Applied Science in Software Engineering; Current GPA: 3.72 Aug 2023 – Expected May 2027

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, PHP, Dart **Web Development:** React.js, Next.js, Laravel
- Mobile/Cross-Platform:** Flutter **Database Management:** SQL, Firebase, Supabase
- Cloud Platforms:** Google Cloud **Agile Methodologies:** Scrum, Kanban
- Other:** UI/UX Design **Languages:** Indonesian (Native), English (Proficient)

PROFESSIONAL EXPERIENCE

- IDN Boarding School** Bogor, Indonesia
Software Development Teacher, Guide & Treasurer Jul 2024 – Jul 2026
 - Delivered a comprehensive 2-year full-stack curriculum, teaching foundational to advanced web development (TailwindCSS, Laravel, React, Next.js) in the first year, and cross-platform mobile development (Flutter) in the second year.
 - Serving as a guide for the “Backpacker 20 Countries” program, coordinating international travel and educational activities.
 - Acting as the program treasurer, managing finances, budgeting, and resource allocation for the 1-year journey.

VOLUNTEER EXPERIENCE

- Google Developer Student Club Widyatama** Mar 2024
Study Jam 7.0 Mobile Development Speaker
 - Delivered an engaging mobile development workshop using Flutter with BLoC, focusing on techniques for consuming APIs.
- Polytechnic of IDN Bogor** Mar 2024
Flutter IT Camp Trainer
 - Trained beginner participants in a 2-day online Flutter workshop, guiding them through building responsive food applications.
 - Showcased methodologies for developing applications compatible with multiple platforms.
- Polytechnic of IDN Bogor** Dec 2023
Front-end Bootcamp Trainer
 - Led a 5-day intensive web development bootcamp, successfully transforming beginners into proficient users of HTML, CSS, JavaScript, and ReactJS frameworks.
 - Fostered a collaborative learning environment, emphasizing teamwork and practical, hands-on application.
- SMKN 1 Cibinong** Nov 2023
Web Development Learning Mentor
 - Led a 1-week intensive web development course for over 25 high school students.
 - Covered fundamental web development concepts and conducted hands-on sessions focused on building responsive user interfaces.

PROJECTS

- **DigiKelas** Next.js, TS, Tailwind, Supabase
Interactive web-based digital learning platform featuring e-modules and mini-games.
 - Developed a client-server architecture utilizing Next.js App Router and Server Actions, integrated with Supabase.
 - Designed a structured learning path with pre/post-tests, interactive e-modules, and 6 interactive educational mini-games.
 - Engineered a gamification system featuring real-time leaderboards and automated graduation certificates.
 - Built a secure, child-friendly PIN-based authentication system alongside quiz time management and anti-cheat protections.
- **InOut** Flutter, Supabase, PostgreSQL
Android application for managing device check-in and check-out tracking.
 - Built a mobile-first Android application directly connecting to a Supabase backend for secure authentication.
 - Implemented fast QR-based check-in/out functionality with robust borrowing history tracking and activity monitoring.
 - Optimized data retrieval using indexed PostgreSQL queries with row-level security (RLS) for data isolation.
- **GasNugas** Next.js, TypeScript, Supabase, Cloudflare
Role-based academic management system with structured workflows.
 - Engineered a hybrid SSR/CSR application with role-based access control spanning Admin, Student, and Guardian portals.
 - Developed comprehensive assignment submission and approval workflows featuring detailed activity logs and penalty tracking.
 - Integrated Supabase for authentication and PostgreSQL operations, and Cloudflare R2 for efficient file edge delivery.
 - Designed a real-time class performance analytics dashboard and implemented a responsive Light/Dark mode UI.
- **Hadirin** Flutter, Firebase, ML Kit, Cloudinary
Mobile attendance app with on-device face recognition and geo-fenced check-in.
 - Implemented on-device face recognition via MobileFaceNet with face embeddings securely stored in Firestore.
 - Engineered geo-fenced check-ins with an admin-configurable radius for verifiable, location-aware records.
 - Integrated Cloudinary for hosting enrolled face images and developed role-based access control (admin/basic).
 - Designed a complete attendance history interface featuring face snapshots, GPS metadata, and persistent themes.
- **mewTime** Next.js, TypeScript, Supabase, PostgreSQL
Self-service attendance platform for online classes.
 - Built a session-based attendance system enabling lecturers to generate and share custom class codes mid-class.
 - Implemented a lecturer dashboard for comprehensive class session management and full attendance history tracking.
 - Developed a student portal for self check-in with live timestamps and secure authentication via Supabase Auth.
- **Class of 2027** Flutter, Firebase, Firestore
Android attendance application for classroom roll calls and session reporting.
 - Developed a daily roll call system with per-student status inputs (Present, Sick, Permission, Absent).
 - Designed session attendance reports with actionable features like "copy present NIS" and weekly recap generation.
 - Integrated Firebase Auth for secure teacher access, Cloud Firestore for student rosters, and Storage for profile photos.
