SUMMARY

Results-driven Software Engineer experienced in architecting and deploying full-stack web and mobile applications (TypeScript, Next.js, Laravel, Flutter) for active production users. Proven technical leader who has mentored 60+ students and managed a Rp 3.4 billion budget while guiding a 36-person international program across 20 countries.

EDUCATION

- Politeknik IDN Bogor** Bogor, Indonesia
Bachelor of Applied Science in Software Engineering; Current GPA: 3.72 Aug 2023 – Expected May 2027

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, PHP, Dart **Web Development:** React.js, Next.js, Laravel
- Mobile/Cross-Platform:** Flutter **Database Management:** SQL, Firebase, Supabase
- Cloud Platforms:** GCP, AWS, Cloudflare **Agile Methodologies:** Scrum, Kanban
- Other:** UI/UX Design **Languages:** Indonesian (Native), English (Proficient)

PROFESSIONAL EXPERIENCE

- IDN Boarding School** Bogor, Indonesia
Software Development Teacher, Treasurer & Guide Jul 2024 – Jul 2026
 - Designed and delivered a rigorous 2-year full-stack curriculum to 60+ students, covering modern web (React, Next.js, Laravel) and cross-platform mobile development (Flutter).
 - Spearheaded financial operations and logistics as Treasurer and Guide for a 36-person international educational program across 20 countries in Asia, Europe, and Africa, successfully managing a Rp 3.4 Billion budget.

VOLUNTEER EXPERIENCE

- Google Developer Student Clubs (GDSC) Widyatama** Bandung, Indonesia
Study Jam 7.0 Mobile Development Speaker Mar 2024
 - Delivered a hands-on mobile development workshop covering Flutter, BLoC architecture, and API integration to 10+ aspiring developers.
- Student Executive Board (BEM), Politeknik IDN Bogor** Online
Flutter IT Camp Trainer Mar 2024
 - Conducted a 2-day online workshop, guiding 3 beginners from scratch to successfully build and deploy a responsive food menu application using Flutter.
- Student Executive Board (BEM), Politeknik IDN Bogor** Bogor, Indonesia
Front-end Bootcamp Trainer Dec 2023
 - Led a 5-day intensive bootcamp where 4 participants successfully built and launched individual personal portfolio websites using React and TailwindCSS.
- SMKN 1 Cibinong** Bogor, Indonesia
Full-Stack Web Development Mentor Nov 2023
 - Mentored 25+ high school students in a 1-week course, resulting in students successfully building PHP/MySQL CRUD applications and deploying static websites to GitHub Pages.

PROJECTS

- DigiKelas** Next.js, TypeScript, Tailwind, Supabase
Interactive digital learning platform with e-modules and gamification.
 - Architected and delivered a custom B2B digital learning platform using Next.js App Router, Server Actions, and Supabase.
 - Engineered a high-engagement gamified learning path featuring pre/post-tests, interactive modules, 6 mini-games, and live leaderboards.
 - Designed a secure, child-friendly PIN authentication system incorporating strict time management and anti-cheat mechanisms for client data privacy.
- InOut** Flutter, Supabase, PostgreSQL
Android app for managing device inventory and check-out tracking.

- Implemented QR-based check-in/out workflows to streamline device inventory management, handling 60 tracked devices per organization account.
- Engineered strict multi-tenant data isolation using indexed PostgreSQL queries and advanced Row-Level Security (RLS) policies in Supabase.
- Developed a highly responsive Flutter UI with real-time borrowing history and activity monitoring.

• **GasNugas**

Next.js, TypeScript, Supabase, Cloudflare R2

Role-based academic management system with assignment workflows.

- Engineered a hybrid SSR/CSR academic management platform with distinct Admin, Student, and Guardian portals using strict role-based access control.
- Developed automated assignment submission and approval workflows tracking 180+ completion targets, featuring real-time activity logging and penalty calculation.
- Optimized file delivery performance by integrating Cloudflare R2 for highly efficient edge storage and content distribution.

• **Hadirin**

Flutter, Firebase, ML Kit, Cloudinary

Mobile attendance app utilizing on-device face recognition and geo-fencing.

- Implemented blazing-fast on-device face recognition using MobileFaceNet, achieving 250ms average embedding comparisons on mid-range Android devices.
- Engineered robust geo-fenced check-ins with <50ms validation latency, delivering a seamless end-to-end attendance flow in 2.5 seconds.
- Architected a secure history interface combining face snapshots, GPS metadata, and optimized Cloudinary media hosting with a Firebase backend.
